Terminal Disclaimer

1. The terminal disclaimer filed on 28 October 2005 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of 03 August 2019 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Scott Lane on 11/08/2005.

The application has been amended as follows:

- a.) In claim 1, line 4, replace the word "dirve" with "drive".
- b.) In claim 10, lines 2, place the word "the" between the words "wherein" and "module".

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a system in a wireless network. The closest prior art remains applicant's US Patent 6,650,695. A search of prior art records has failed to disclose a system comprising; " a module in communication with the antenna, the module to drive me antenna to produce carrier waves having a succession of frequencies, the module further to drive the antenna to produce a modulated carrier wave to transmit a first protocol message, the first protocol message including data for the succession of frequencies, the module further to drive the antenna to produce carrier waves of at least two of the succession of frequencies prior to transmission of a second protocol message; and a demodulator to receive and demodulate a received differential phase shift keying (DPSK) modulated carrier wave", or a module in communication with the dipole antenna, the module to receive the signal indicative of the received EM waves, the module further to decode a first protocol message included in the signal, the first protocol message including data for a succession of predetermined carrier wave frequencies, the module further to modulate a reflectivity of the dipole antenna to reflect at least a portion of received EM waves having at least two of the succession of predetermined carrier wave frequencies prior to receiving a second protocol message" as disclosed in claims 1, 8, and 13, respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

CONCLUSION

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lawrence B Williams whose telephone number is 571-272-3037. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kenneth Vanderpuye can be reached on 571-272-3078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
